

RPA with UI path and Automation anywhere

Who we are

Techeduxon has been a platform for global online technology education since 2015. We are now taking it up a notch higher by introducing ways of advanced learning to up-skill and cross-skill your profession with cutting-edge, customized programs. With the amazing courses and programs by Techeduxon, you will experience a whole new horizon of tech knowledge and put it to the best use.

Course overview

- Introduction to Robotic Process Automation

- UiPath Automation, system activities
- User events and data scraping
- UiPath Orchestrator
- Workflow OCR & citrix Automation activities
- REFramework

Pre requisites

Basic programming knowledge of any development language (C#, .Net, VB, Java, etc.) is beneficial.

Target audience

Developers, Project managers, Architects, operations support, Team leaders, Product managers.

Course Content

Introduction to Robotic Process automation

- RPA & Industry Implementation of RPA
- RPA Growth Trends
- Different RPA Tools
- Types of Bots
- UiPath & UiPath Installation
- Setting Up the Browser

UiPath Automation, system activities

- UI automation & System Activities
- Demo on System Activities
- Types of Variables
- Output Panel
- Custom Packages
- Managing Arguments
- Understanding Scopes

User events and data scraping

- User Events and Common User Events
- Excel, CSV and Mail Automation
- Data Scraping and Types
- Selectors and Wildcards
- Selector Editing
- Adding Variables and Relative Element

UiPath Orchestrator

- Orchestrator Overview & Connecting a Robot
- Create an Environment and Associate the Robot
- Publish a Package
- Create a Process From the Package
- Run a Robot and Examine Logs
- Queues in Orchestrator
- Schedule and Run an Unattended Robot

Workflow OCR & citrix Automation activities

- Workflow Activities
- Citrix Automation
- Introduction to PDF Automation
- PDF Automation Using OCR
- Introduction to Orchestrator Activities

REFramework

- Overview & Components of Reframe work
- Configuration of File
- Global Variables
- The Default Type of Variables in the Main Workflow

Project 1

Automate Claims Processing

Automate the process of reading the claim form using OCR to extract the information, validate it, update the claims system, and notify the claim processor.

Project 2

Follow up on Customer Service Levels with Salesforce

Use RPA to identify the workflow, process mapping, and bot integration to follow up on customer service levels.

Projects & Assignments

Our Expert trainers will provide the real time Projects & Assignments.
